Die Dessinbeispiele zeigen eine Stoffbreite im Original von ca. 200 cm.

The sample fabrics show the fabric in the original width of 200 cm.

Les exemples de dessins montrent une largeur du tissu d'environ 200 cm.

Gli esempi nelle immagini raffigurano un tessuto che in versione reale è largo circa 200 cm.

El ejemplo del diseño muestra un ancho de tejido de 200 cm.

world of colours

Sicher. Zeitlos. Schön.

Mit einem Markisentuch von markilux entscheiden Sie sich für ein hochwertiges Qualitätsprodukt.

Alle Gewebe werden auf modernsten Webmaschinen hergestellt. Sorgfältige Kontrollen gewährleisten zudem, dass nur funktionell einwandfreie Tücher zur Auslieferung gelangen.

Markisentücher dienen aber nicht nur als wirksamer Sonnenschutz. Sie beeinflussen auch entscheidend die Farbstimmung und die Atmosphäre unter einer Markise.

Für noch mehr farbigen Schatten bietet markilux eine umfangreiche Kollektion mit mehr als 250 Tuchdessins aus den innovativen Hightech-Polyesterstoffen an.

Safe. Timeless. Beautiful.

With the purchase of a markilux awning cover you have chosen a high-class quality product.

All fabrics are manufactured on state-of-the-art weaving mills. Meticulous checks also ensure that we only ever supply functionally flawless covers.

However, awning covers do not only serve as effective protection from the sun. They also have a decisive impact on the colour ambience and hence the atmosphere under an awning.

For even greater enjoyment of the colour provided by the shade of an awning, markilux has made an extensive collection of more than 250 fabrics made from innovative, high-tech polyester yarns.

Fiable. Intemporel. Élégant.

Vous avez opté pour l'achat d'une toile de store markilux et donc pour un produit de haute qualité.

Tous nos tissus sont fabriqués sur des métiers à tisser les plus modernes. Des contrôles approfondis assurent en outre des toiles irréprochables à la livraison.

Les toiles de store ne servent pas uniquement à protéger efficacement du soleil. Elles ont aussi une grande influence sur les couleurs et l'ambiance sous un store.

Pour d'autant plus d'ombre en couleur, markilux met à disposition une vaste collection avec plus de 250 motifs de toile en tissu polyester high-tech et innovants.

Sicuro. Eterno. Elegante.

Acquistando un telo per tende da sole markilux avete optato per un prodotto di ottima qualità.

Tutti i tessuti vengono fabbricati su telai di tessitura all'avanguardia. Inoltre, attraverso controlli accurati, garantiamo che solo i teli in stato ineccepibile vengano abilitati alla distribuzione.

I nostri teli non proteggono solo efficacemente dal sole. Influenzano anche in modo decisivo l'ambiente cromatico e l'atmosfera che si crea sotto la tenda.

Per un'ombra ancora più colorata markilux offre un'ampia collezione con più di 250 diversi disegni per teli di tessuti innovativi in poliestere ad alta tecnologia.

Fiable. Intemporal. Elegante.

Con la compra de una lona para toldos markilux, se ha decidido por un producto de máxima calidad.

Todos nuestros tejidos son confeccionados en las tejedoras más modernas. Además controles minuciosos garantizan que sólo las lonas en perfecto estado sean suministradas.

Las lonas del toldo no sólo tienen la función protectora del sol. También influyen determinadamente en los colores que proyectan y por lo tanto en el ambiente debajo del toldo.

Para una sombra aún más colorida, markilux presenta una amplia colección de más de 250 diseños hechos de innovadores tejidos poliéster de alta gama.

visutex – exclusively from markilux

Für den anspruchsvollen Geschmack hat das Designteam von markilux die visutex Kollektion entwickelt.

visutex, das ist stylisch-modernes Design in lebendig-strukturierter Webart. Fein abgestimmt auf Strukturen und Farben von Terrasse und Garten.

Acht kraftvolle Farbthemen und elegante Dessins verleihen den exklusiv für markilux designten Tüchern eine einzigartige Handschrift. Strahlend und brillant in sunsilk snc-Qualität und soft leuchtend in neuer sunvas snc-Ausführung.

The stylists at markilux have developed the visutex collection to cater specifically for exacting tastes.

visutex is stylishly modern design embodied in a vividly textured weaving technique. Delicately reflecting the colours and textures of patio and garden.

Eight vibrant colour families and elegant patterns lend the fabrics, designed exclusively for markilux, a unique signature. Radiating and brilliant in the sunsilk snc quality and gently glowing in the new sunvas snc version.

Pour les goûts exigeants, l'équipe de designers markilux a développé la collection visutex.

visutex, c'est un tissu design très style et moderne en mode de tissage vif et structuré. Ces toiles harmonisent bien avec les structures et les couleurs de la terrasse et du jardin.

Huit thèmes de couleur très puissants et des motifs très élégants transforment les toiles ayant exclusivement été conçues pour markilux en tissus uniques. En sunsilk snc avec une forte brillante et en sunvas snc avec une luminosité douce.

Per i gusti più esigenti il team di markilux ha sviluppato la nuova collezione visutex.

Visutex coniuga un design moderno a una trama del tessuto visibile. Si intona bene alle strutture e ai colori di terrazze e giardini.

Otto temi di colori potenti e disegni eleganti conferiscono ai teli esclusivi per markilux una nota unica. Disponibili nelle varianti sunsilk snc, che trasmette colori brillanti, e sunvas snc, dall'effetto più tenue.

Para aquellos que tiene un gusto exigente, los diseñadores de markilux han desarrollado la colección visutex.

visutex es el diseño moderno-stylish con una forma viva-estructurada de tejer. De tal forma es un buen complemento de estructuras y colores en la terraza y el jardín.

Ojo temas de colores llamativos y diseños elegantes confieren a las lonas exclusivas markilux una signature única. Intenso y brillante en la calidad de sunsilk snc, con colores pastel y más finos en sunvas snc.

Sunshine

Raggio di sole
Soleil
Sol
Sonnenschein

gelb – Sonnenschein

Gelb besitzt je nach Intensität eine heitere, sanft anregende Eigenschaft und vermittelt eine warme, behagliche Atmosphäre.

Dennoch bewirkt Gelb immer auch Veränderung und steht für Merkmale wie aufregend, fröhlich, heiter, freudig. Es sorgt für einen sonnigen, aber erfrischenden Schatten.

yellow – sunshine

Depending on its intensity, yellow has a bright, gently stimulating property and conveys a warm, comfortable atmosphere.

All the same yellow provokes change and stands for characteristics such as stimulating, contented, bright, happy. It provides sunny but refreshing shade.

jaune – Soleil

La couleur jaune possède selon son intensité des caractéristiques sereines et activatrices et crée une ambiance chaleureuse et agréable.

Pourtant, le jaune produit des fois aussi un changement et désigne des traits excitants, plaisants, gais, joyeux et allègres. Il crée une ombre ensoleillée mais rafraîchissante.

giallo – sole

Il giallo è allegro, solleva il morale e trasmette gioia in ogni ambiente e crea un'atmosfera armoniosa.

Il giallo porta anche cambiamento e rappresenta caratteristiche come allegria, serenità e gioia. Crea un'ombra soleggiata e rinfrescante.

amarillo – sol

El amarillo – dependiendo de su intensidad – representa características alegres, ligeramente estimulantes y proporciona un cálido ambiente agradable.

El color amarillo también implica un cambio y representa todos los matices de la alegría. Proporciona una sombra soleada y fresca.

world of colours

Dinamico
Dynamique
Dinámica
Dynamik
Dynamic

pink – Dynamik

Die kräftige und satte Farbe steht für Modernität und Feminismus. Aber, sie bringt auch den Charakter einer positiven und expressiven Einstellung mit sich.

Als Abwandlungen zu rosa, brombeere oder lilapink ist sie besonders mit schlichten Farben sehr gut kombinierbar.

pink – dynamism

The strong and rich shade of this colour represents modernity and feminism. But, it also brings the sense of a positive and expressive attitude with it.

Modified towards light pink, blackberry or lilac it can be combined very well with sober, plain colours

rose vif – Dynamisme

La couleur forte et puissante désigne modernisme et féminisme. Mais elle entraîne également un point de vue positif et expressif.

En variante avec du rosé, mûre ou mauve-rose vif elle peut très bien être combinée avec des couleurs simples.

rosa – dinamica

Il colore, potente e pieno è sinonimo di modernità e femminismo. Ma indica anche il carattere di un atteggiamento positivo ed espressivo.

Nelle sue tonalità rosa, mora o fucsia è particolarmente compatibile con i colori sobri.

fucsia – dinámica

Este color intenso representa modernidad y feminismo. Pero también tiene un carácter positivo y expresivo.

Los matices en rosa, color mora o lila- fucsia se combinan muy bien con colores lisos y sencillos.

Nature
Natura
Naturaleza
Natur
Nature

grün – Natur

Grün ist die Symbolfarbe für Hoffnung und Leben. Die mit diesem Farbthema verbundenen Begriffe wie saftig, frisch, Frühling und Leben gehören alle zur Natur.

So passt sich die Farbe auch auf der Markise perfekt an die Außensituation und den Garten an.

green – nature

Green is the colour symbolic of hope and life. The terms connected to this colour family, such as gentleness, freshness, spring and life, all belong to nature.

Consequently, when fitted to an awning, this colour suits the outdoors and the garden perfectly.

vert – Nature

Le vert est la couleur symbolisant l'espoir et la vie. Les mots-clés liés à ce thème de couleur comme juteux, frais, printemps et vie correspondent tous à la nature.

Ainsi, la couleur mise sur un store s'adapte bien à la situation en plein air et au jardin.

verde – natura

Il verde è il colore della natura e simboleggia la vita e la speranza. I termini legati a questo colore quali freschezza, primavera e vita appartengono tutti alla natura.

Di conseguenza il colore della tenda si adatta perfettamente agli ambienti esterni e ai giardini.

verde – naturaleza

Verde es el color simbólico de esperanza y vida. Este color abarca conceptos relacionados con la naturaleza como jugoso verde, fresco, primavera y vida.

De tal forma el toldo en este color adapta perfectamente el exterior y el jardín.

Harmony

Armonia
Armonía
Harmonie
Harmonie

blau – Harmonie

Die erklärte Lieblingsfarbe vieler Menschen strahlt Ruhe und Harmonie, aber auch Sehnsucht aus. Blau ist der Moment der Erholung und es enthält einen passiven Entspannungseffekt.

So lässt es sich vor allem unter einem blauen Tuch besonders genügsam verweilen.

blue – harmony

The proclaimed colour of love for many exudes a sense of calm and of harmony, but also of desire. Blue represents a moment of repose and passively it promises a sense of relaxation.

It is therefore particularly pleasant to while away the time under a blue awning cover.

bleu – Harmonie

La couleur favorite de beaucoup de gens diffuse non seulement la tranquillité et l'harmonie, sinon aussi la nostalgie. Le bleu est le moment de repos et contient un effet passif de détente.

Ainsi, le repos sous une toile bleue est particulièrement agréable.

blu – armonia

Il colore preferito di molte persone emana calma, armonia, ma anche nostalgia. Blu è il momento di riposo e contiene un effetto di rilassamento passivo.

È particolarmente piacevole trattenerci sotto un telo blu.

azul – armonía

El color favorito de muchos irradia calma y armonía pero también anhelo. Azul representa momentos de descanso y nos facilita un efecto pasivo de relajación.

Debajo de una lona azul se puede relajar muy agradablemente.

sunsilk 36975

visutex

Esclusività.
Exclusivity
Exclusivité
Exclusividad
Exklusivität

grau-schwarz – Exklusivität

Schwarz ist die Farbe des hohen Prestige und des Designs. Sie wertet Produkte auf und macht sie exklusiver, stärker und moderner.

Vor allem architektonisch wertet die Farbe viele Terrassensituationen noch ein Stück weiter auf.

grey-black – exclusiveness

Black is the colour of prestige and of design. It increases a product's value and makes it more exclusive, stronger and more modern.

Above all from an architectural point of view the colour further enhances the status of many a patio.

gris-noir – Exklusivité

Le noir est la couleur du grand prestige et du design. Elle valorise d'autant plus les produits et les rend plus exclusif, plus fort et plus moderne.

Surtout, la couleur valorise beaucoup de situations de terrasse.

grigio-nero – esclusività

Il nero è il colore del prestigio e del design. Valorizza i prodotti e li rende più esclusivi, forti e moderni.

Dal punto di vista architettonico, attraverso il nero vengono messi ancor più in valore molti terrazzi.

gris-negro – exclusividad

Negro es el color de alto prestigio y diseño. Valorea productos y hace que parezcan más exclusivos, más fuertes y más modernos.

Sobre todo en la arquitectura el color aún le da un toque más exclusivo a diferentes tipos de terrazas.

visutex Tango

Aufgrund einer Tuchkonfektion aus zwei unterschiedlichen Tuchdessins sind geringfügige Farbabweichungen zwischen den einzelnen Stoffbahnen unvermeidbar.

Die farbigen Streifen (A) bleiben außen in voller Breite erhalten. Die innenliegenden Uni-Stoffbahnen (B) können in der Anzahl und Breite variieren.

Because visutex Tango awning covers are made up of two different fabric patterns, minor variations in colour between the individual fabric panels cannot be avoided.

The outer, striped panels (A) are used in their full width, whereas the plain fabric panels (B) in between can vary in both number and width.

La confection de la toile en deux motifs de toile visutex Tango rend inévitables les petites divergences de couleur entre les différents panneaux de tissu. Les rayures de couleur (A) conservent leur largeur totale à l'extérieur. Les panneaux de tissu unis à l'intérieur (B) peuvent varier en nombre et en largeur.

Nei disegni visutex Tango, la confezione prevede tessuti con due disegni differenti, pertanto delle lievi differenze di colore tra i tagli di tessuto risultano inevitabili. All'esterno, le strisce colorate (A) mantengono l'intera larghezza. I campioni a tinta unita che si trovano all'interno (B) possono variare in quantità e larghezza.

En los diseños visutex Tango es inevitable la presencia de mínimas variaciones en el color entre los tejidos debido a que la lona está confeccionada a partir de dos diseños diferentes. Por fuera, las rayas de color (A) se mantienen en todo lo ancho. Las rayas lisas interiores (B) pueden variar en cantidad y ancho.

sunsilk snc

Sieben sommerlich frische Farbthemen und feine Ton-in-Ton Dessins betonen das klare Design von sunsilk snc. Sie geben dem transparenten Gewebe aus veredeltem Hightech-Polyester mit dem typisch brillanten Leuchten eine neue spannende Note.

sunsilk snc ist moderne Optik mit technischen Spitzenwerten: langlebig, farbbeständig, strapazierfähig und mit selbstreinigendem Effekt.

Seven summery and fresh colour families and delicate tone-in-tone fabric patterns emphasise the clear design concept behind sunsilk snc. They lend the transparent material made of refined, high-tech polyester with its typical, brilliant luminescence a new and exciting appeal.

sunsilk snc combines ultra-modern appearance with an outstanding technical specification: durable, colourfast, resilient and with a self-cleaning effect.

Sept thèmes de couleur estivaux et frais ainsi que des motifs de toile en ton sur ton soulignent le design très clair du tissu sunsilk snc. Ils confèrent une nouvelle note fascinante au tissu transparent en polyester hightech affiné ayant une luminosité particulièrement brillante.

sunsilk snc combine une apparence moderne avec des valeurs techniques maximales: de longue vie, résistant à la lumière, robuste et avec un effet autonettoyant.

Sette temi di colori estivi e freschi, e sottili disegni tono su tono, accentuano il design pulito di sunsilk snc. Con la loro luminosità brillante, conferiscono al tessuto trasparente in raffinato poliestere ad alta tecnologia una nuova nota emozionante.

sunsilk snc coniuga apparenza moderna con caratteristiche tecniche superiori quali durevolezza, resistenza allo scolorimento, robustezza ed effetto autopulente.

Siete temas de frescos colores veraniegos y finos colores lisos definen el diseño claro de sunsilk snc. Le dan un toque innovador y emocionante al tejido transparente de poliéster high-tech con el típico brillo intenso.

sunsilk snc une un aspecto moderno con altos valores técnicos: duradero, con colores de larga vida, resistente y con efecto de auto-limpieza.

sunvas snc

Dessins in ruhigen, gedeckten bis pastelligen Farben in sieben Farbthemen verleihen sunvas snc einen traditionell-modernen Charakter.

Das textile Gewebe mit weichem, flauschigem Griff und softem Farb-leuchten versprüht gemütlichen Charme.

sunvas snc ist romantische Optik mit technischen Spitzenwerten: langlebig, farbbeständig, strapazierfähig und mit selbstreinigendem Effekt.

Fabrics in restrained, muted, pastel colours in seven colour families lend sunvas its traditional yet modern character.

The textile material with a soft, fluffy touch and gentle colour glow radiates a socially appealing charm.

sunvas snc combines romantic appearance with an outstanding technical specification: durable, colourfast, resilient and with self-cleaning effect.

Des motifs de toile en couleurs douces, classiques et pastel en sept thèmes de couleur confèrent à sunvas snc un caractère traditionnel et moderne à la fois.

Le tissu textile d'un toucher doux et cotonneux et d'une luminosité douce fait preuve de beaucoup de charme.

sunvas snc combine une apparence romantique avec des valeurs techniques maximales: de longue vie, résistant à la lumière, robuste et à effet autonettoyant.

I disegni in tonalità pastello, calme e morbide, disponibili in sette temi di colori, conferiscono a sunvas snc un carattere tradizionale e moderno.

Il tessuto dall'effetto luminoso tenue, con la sua trama molto soffice e lanosa al tatto, emana un gradevole charme.

sunvas snc coniuga l'aspetto romantico con caratteristiche tecniche superiori quali durevolezza, resistenza allo scolorimento, robustezza ed effetto autopulente.

Los siete temas de colores abarcan diseños de colores apagados hasta pastel y así contribuyen al carácter tradicional-moderno de sunvas snc.

El tejido textil con una háptica suave y colores retentivos irradia un encanto agradable.

sunvas snc une un aspecto romántico con altos valores técnicos: duradero, con colores de larga vida, resistente y con efecto de auto-limpieza.

classics

Immer gut kombinierbar und stil-sicher zeigen sich die einfarbigen classics-Dessins.

Das gut sortierte Kollektionsangebot an neutralen, eleganten Unis gibt es in farbbrillanter sunsilk snc Qualität und in soft leuchtender sunvas snc Ausführung. Passend für jeden Farbgeschmack.

The monochrome classic patterns are always stylistically sure of themselves and easy to mix and match.

The well appointed range of neutral, elegant plains in the collection is available in both the luminescent sunsilk snc and the gently glowing sunvas snc qualities. Matching every taste in colour.

Les dessins classiques unis peuvent toujours bien être combinés avec d'autres motifs de toile.

La gamme des toiles unies neutres et élégantes existe en qualité sunsilk snc fortement brillante et en sunvas snc avec une luminosité douce. Pour tous les goûts, quelle que soit la couleur.

I disegni classici a tinta unita sono sempre abbinabili e alla moda.

L'ampia collezione di tinte unite, dalle tonalità neutre ed eleganti, è disponibile nelle varianti sunsilk snc, che trasmette colori brillanti, e sunvas snc, dall'effetto più tenue. Adatta ad ogni gusto.

Los diseños clásicos lisos se muestran de forma bien combinable y de buen estilo.

La colección bien clasificada de lonas lisas neutras y elegantes las ofrece en la calidad sunsilk snc con colores brillantes y en sunvas snc con colores más finos. Adecuado para cada gusto de colores.

perfotex

Das spezielle Gewebe für markilux Wintergartenmarkisen aus Hightech-Polyester in bewährter sunsilk Qualität. Eine zusätzliche Aluminiumbeschichtung wird die Wärme noch besser reflektieren, bevor sie im Wintergarten ankommt.

Das licht- und luftdurchlässige Gewebe in besonderer Webtechnik sorgt für eine angenehme Transparenz und vermindert die Bildung von Wassersäcken, die das Tuch belasten können.

Eine hochwertige Teflon-Ausrüstung bietet zudem einen bewährten „Schutz vor Schmutz“ und sorgt für eine nötige Wasserabweisung.

The special fabric for markilux conservatory awnings made from high-tech polyester material in proven sunsilk quality. An additional aluminium coating reflects heat even more effectively, even before it can enter the conservatory.

This light and air-permeable fabric woven using a special technique is pleasantly transparent and reduces the possibility of water troughs forming, which would put extra strain on the cover.

Furthermore, a high-grade Teflon finish offers tried and tested protection from soiling and gives the fabric its water-repellent properties.

Le tissu spécial pour stores de vérandas markilux, en polyester high-tech, de qualité sunsilk éprouvée. Grâce à un revêtement aluminium supplémentaire, la chaleur sera réflétée encore mieux avant de rentrer dans la véranda.

Grâce à une technique de tissage particulière, ce tissu est perméable à la lumière et à l'air, il offre une transparence

agréable et empêche la formation de poches d'eau qui pourraient nuire à la toile.

Un revêtement téflon haut de gamme permet en plus une protection efficace contre la salissure et procure au tissu des propriétés hydrofuges.

Lo speciale tessuto delle tende per giardini d'inverno in poliestere ad alta tecnologia nella variante pregiata sunsilk. Un ulteriore rivestimento in alluminio riflette ancora meglio il calore prima che penetri all'interno del giardino d'inverno.

Il tessuto trasparente e permeabile all'aria, realizzato con una tecnica di tessitura particolare, garantisce una gradevole trasparenza e minimizza la formazione di sacche d'acqua che possono danneggiare il telo.

Un pregiato rivestimento in Teflon offre protezione contro lo sporco e conferisce al tessuto proprietà idrorepellenti.

El tejido especial para toldos veranda markilux, hecho de poliéster de alta gama en la calidad acreditada de sunsilk. Un acabado de aluminio especial hace reflejar aún mejor el calor antes de que entre al cerramiento.

El tejido translúcido y permeable asegura una transparencia agradable y reduce el efecto que se cuelga la lona debido al agua de lluvia.

El acabado de teflón además garantiza una protección acreditada contra la suciedad y le confiere a la tela propiedades repelentes al agua.

Das perfortex-Gewebe verfügt über eine beidseitige Aluminiumbeschichtung. Durch das spezielle Herstellungsverfahren weist das Gewebe eine unterschiedliche Alupigmentierung an der Tuchoberseite und Tuchunterseite auf. Die Tuchoberseite mit höherer Alupigmentierung wird dabei zur besseren Reflektion nach oben konfektioniert.

perfortex fabrics are finished with an aluminium pigmentation on both sides. Due to the special manufacturing technique different concentrations of this finish are found on the upper and underside of the fabrics. Accordingly, the side of the fabric with the higher concentration in pigmentation is placed facing upwards in order to attain the maximum benefits in heat and light reflection.

Le tissu perfortex dispose d'un revêtement aluminium (pigmentation alu) des deux faces. Du au processus de fabrication spécial, le tissu aura une pigmentation alu différente du côté supérieur par rapport au côté inférieur de la toile. La surface supérieure de la toile avec une pigmentation alu renforcée sera confectionnée vers le haut pour une meilleure réflexion.

Il tessuto perfortex dispone di un rivestimento in alluminio sui due lati (pigmentazione in alluminio). Grazie allo speciale processo di fabbricazione, la pigmentazione in alluminio del lato inferiore del tessuto è diversa da quella del lato superiore. Il lato del telo con elevata pigmentazione in alluminio è confezionato come lato superiore per consentire una migliore riflessione.

El tejido perfortex dispone de un acabado de aluminio de ambos lados. Debido al procedimiento especial de fabricación la pigmentación de aluminio en el tejido puede diferir entre cara superior e inferior. La cara con una pigmentación de aluminio más alta será confeccionada como cara superior por su mejor reflexión.

vuscreen ALU

Fein perforiert und leicht transparent, ist das Gewebe vuscreen moderner Sonnen- und Blendenschutz für markilux Fenstermarkisen. Es schützt vor reflektierendem und spiegelndem Licht.

Aluminiumpartikel auf den Fasern des pflegeleichten Hightech-Polyestergewebessorgen durch Wärmereflexion für ein angenehmes Raumklima.

The vuscreen material used to create modern sun and glare protection covers for markilux vertical blinds and awnings is finely perforated and transparent to a limited degree. It protects against reflected light.

Particles of aluminium on the fibres of this easily-cared-for, high-tech polyester fabric ensure a pleasant room temperature by reflecting heat.

Grâce à sa légère perforation et transparence, le tissu vuscreen est une protection moderne contre le soleil et l'éblouissement adaptable aux stores de fenêtre markilux. Il protège contre une lumière réfléchissante et miroitante.

Des particules en aluminium sur les fibres du tissu polyester high-tech facile à entretenir permettent un climat d'intérieur agréable grâce à la réflexion de la chaleur.

Il tessuto vuscreen, finemente perforato e leggermente trasparente, è la moderna protezione contro il sole e l'abbagliamento delle tende da sole per finestre markilux. Protegge dalla luce riflessa.

Sulle fibre del tessuto in poliestere ad alta tecnologia, facile da curare, sono presenti particelle in alluminio che permettono di ottenere un clima confortevole nella stanza grazie alla riflessione termica.

Perforado finamente y ligeramente transparente, el tejido vuscreen es una protección moderna de luz deslumbrante para toldos para ventanas markilux. Protege de luz reflejante.

Partículas de aluminio en las fibras del tejido poliéster de alta calidad se encargan de un ambiente agradable interior gracias a la reflexión del calor.

vuscreen ALU

sunsilk perla FR

sunsilk perla FR ist ein qualitativ hochwertiger Markisenstoff auf Basis des innovativen Hightech-Gewebes sunsilk snc. Das beschichtete Gewebe ist wasserdicht und schwer entflammbar und sollte überall dort, wo Brandschutzvorschriften einzuhalten, sowie Schutz vor Regen oder Sonne eine dekorative Wirkung gefragt sind, eingesetzt werden.

Bei sunsilk perla FR durchdringen bei Tageslicht die leuchtenden Farben die weiße Tuchunterseite des Stoffes, was die Farbgestaltung des Innenraums ganz nach Ihrem Geschmack ermöglicht und auch am Abend für eine helle, freundliche Atmosphäre sorgt.

sunsilk perla FR is a high-quality awning fabric based on the innovative, high-tech fabric sunsilk snc. This coated fabric is waterproof and flame retardant and should be used wherever fire safety regulations are to be observed and protection from both rain and sun and a decorative effect is required.

In daylight, the radiant colours pass through the white underside of the sunsilk perla FR fabric, which makes it possible to tailor the colour design of the interior space to the specific requirements of the customer but also ensures a bright, friendly atmosphere in the evening.

sunsilk perla FR est une toile de store de qualité supérieure réalisée sur la base du tissu hautement performant sunsilk snc. Ce tissu revêtu est imperméable et difficilement inflammable et donc impératif partout où des mesures de protection contre l'incendie sont requises, ainsi que là où une protection contre la pluie ou le soleil et un effet décoratif sont désirés.

Exposées à la lumière du jour, les couleurs lumineuses de sunsilk perla FR traversent le verso blanc de la toile ce qui permet une conception des couleurs de l'espace intérieur selon votre goût ; le soir aussi, les couleurs créent une ambiance claire et avenante.

sunsilk perla FR è un tessuto per tende da sole di alta qualità, che si basa sull'innovativo tessuto ad alta tecnologia sunsilk snc. Il tessuto rivestito è impermeabile e difficilmente infiammabile e dovrebbe essere impiegato ovunque sia indispensabile rispettare disposizioni di prevenzione degli incendi e dove sono richieste proprietà di protezione dalla pioggia o dal sole e un effetto decorativo.

Di giorno i colori luminosi penetrano attraverso l'abside bianco del tessuto di sunsilk perla FR, consentendo una personalizzazione cromatica dello spazio interno e garantendo un'atmosfera luminosa e confortevole anche la sera.

sunsilk perla FR es un tejido de toldo de alta calidad basado en el tejido innovador sunsilk snc. El tejido con un acabado especial es impermeable e ignífugo y debería emplearse en zonas en las que es obligatorio cumplir los reglamentos contra incendios, así como donde es necesario ofrecer tanto una protección ante la lluvia o el sol como un efecto decorativo.

Con la luz del día los colores de perla FR penetran la blanca cara inferior del tejido y así ofrecen nuevas posibilidades de diseñar los espacios interiores al gusto individual para un ambiente agradable incluso por la tarde.

sunvas perla

sunvas perla ist ein qualitativ hochwertiger Markisenstoff auf Basis des Hightech-Gewebes sunvas snc mit hervorragenden technischen Eigenschaften. Das Gewebe verfügt über eine **transparente Beschichtung**.

Die Farbwirkung ist dadurch gegenüber den unbeschichteten sunvas Stoffen nahezu unverändert. sunvas perla ist **wasserdicht** und wetterbeständig und das Gewebe bietet einen optimalen Schutz vor Regen und Sonne bei höchstem UV-Schutz (UPF 50+).

sunvas perla is a high-quality awning fabric based on the innovative, high-tech fabric sunsilk snc with its outstanding technical characteristics. The material has a transparent coating.

The colour effect of the material is virtually unchanged in comparison with the uncoated version. sunvas perla is waterproof and impervious to the effects of the weather and the high-tech material offers optimum protection against both sunshine and inclement weather whilst offering exceptional protection from UV radiation as well (UPF 50+).

sunvas perla est un textile pour stores hautement qualitatif à base de tissu hightech sunvas snc aux caractéristiques techniques exceptionnelles. Le tissu présente un revêtement transparent.

L'effet des couleurs est quasiment inchangé par rapport aux textiles sunvas non revêtus.

sunvas perla est imperméable et résistant aux intempéries, ce tissu offre une protection optimale contre la pluie et le soleil, et particulièrement contre les UV (FPS 50+).

sunvas perla è un tessuto per tende da sole di alta qualità con caratteristiche tecniche superiori. Il tessuto dispone di una spalmatura trasparente.

L'effetto cromatico in confronto ai tessuti sunvas non rivestiti rimane quasi invariato. Sunvas perla è impermeabile e resistente agli agenti atmosferici. Il tessuto garantisce la migliore protezione contro pioggia e sole con il valore di protezione ai raggi UV più alto (UPF 50+).

sunvas perla es un tejido para toldos de alta calidad basado en el tejido innovador sunvas snc con excelentes características técnicas. El tejido dispone de un acabado transparente.

Gracias a ello, el efecto de colores es casi parecido en comparación con las lonas sunvas sin acabado especial. sunvas perla es impermeable y resistente a la intemperie, además este tejido protege de forma óptima de lluvia y sol con una máxima protección UV (UPF 50+).

sunvas transolair

Details

Markisentücher sind Sonnenschutz und Blickfang zugleich. Sie schaffen Ambiente und spenden kühlenden Schatten. Sie schützen vor neugierigen Blicken sowie grellem Licht. Terrassen und Balkone werden mit einer Markise zu Lieblingsplätzen.

Wer vorhat, seine Terrasse oder seinen Balkon damit auszustatten, der sollte sich vorher über die dekorativen Multitalente ausführlich informieren. Denn Markise ist nicht gleich Markise: auch auf das Tuch kommt es an.

Beauty under the sun. Combining eye-catching design with effective sun protection, they help to create a pleasant atmosphere while offering cool shade. They protect against inquisitive glances and glare. An awning can turn your terrace or balcony into your favourite place to steal away.

If you're thinking of installing one on your terrace or balcony, then make sure you find out more about decorative, versatile awnings first. After all, not all awnings are created equal: Fabric also plays a key role.

Des toiles de store protègent du soleil et accrochent aussitôt le regard. Ils confèrent une ambiance particulière au lieu tout en dispensant une ombre rafraîchissante. Ils mettent à l'abri des regards curieux et de la lumière aveuglante. À la fois décoratifs et fonctionnels, les stores font très vite de la terrasse l'endroit favori de la maison.

Mais avant d'équiper sa terrasse ou son balcon, il convient de s'informer soigneusement – car il y a store et store. La toile de store revêt elle aussi un rôle clé.

Le tele solari proteggono dal sole e allo stesso tempo catturano lo sguardo. Creano un'atmosfera piacevole e permettono di rinfrescarsi all'ombra. Proteggono dagli sguardi indiscreti e dalla luce intensa. Con una tenda da sole, terrazzi e balconi diventano i luoghi preferiti per il tempo libero.

Chi ha intenzione di acquistarne una, dovrebbe in primo luogo informarsi dettagliatamente su questi prodotti decorativi e funzionali. Le tende da sole non sono tutte uguali ... anche il tessuto ha la sua importanza.

Lonas para toldos a la vez sirven como protección solar pero también son un atractivo. Crean ambiente y nos proporcionan sombra. Protegen de miradas indiscretas y de luz deslumbrante. Gracias a un toldo la terraza o el balcón se convierte en un lugar favorito.

Quien desea decorar su terraza o balcón con un toldo, antes debería informarse detalladamente. Toldo no es toldo, también importa la lona.

world of colours

Schönere Optik durch geklebte Tücher

Das hoch verdichtete Ultraschallklebeverfahren bietet vielfältige Vorzüge: Die Bahnenverbindungen (frühere Nähte) sind unter normalen Umständen wasser-, licht- und temperaturbeständig.

Das Tuch besitzt durch seine angriffsfreie Oberfläche eine längere Lebensdauer. Zudem verhindert das Klebeverfahren ein vorzeitiges Altern des Nähgarns durch Witterungseinflüsse.

Bonded seams lend awning covers an improved appearance

Ultrasonic adhesive technology offers a wide range of advantages: Under normal conditions compression bonded panel joints are impermeable to light and water and resistant to changes in temperature.

Thanks to its smoother surface, the fabric has a longer life-span. In addition bonding avoids the problem of premature ageing of the thread as a result of UV radiation and weathering.

Une plus belle apparence grâce aux toiles de store collées

Le procédé de collage aux ultrasons offre de nombreux avantages: en temps normal, les jonctions des laizes (autrefois coutures) sont imperméables et résistantes à l'eau, à la lumière et aux intempéries.

La toile possède une plus grande durée de vie, par l'absence d'aspérités à sa surface. De plus, le collage évite un vieillissement prématuré des fils de couture dû aux intempéries.

Apparenza più bella ed elegante mediante un tessuto saldato

Il procedimento di termosaldatura ad ultrasuoni offre svariati vantaggi: in condizioni normali le saldature (le cuciture di una volta) sono impermeabili, resistenti alla luce e termostabili.

Grazie alla sua superficie priva di asperità, il telo dura di più. Inoltre il procedimento di saldatura previene l'invecchiamento precoce dei filamenti causato dagli agenti atmosferici.

Un mejor aspecto por medio de lonas soldadas

El proceso de soldadura ultrasónica tiene varias ventajas: Las uniones de los anchos (anteriormente costuras) son resistentes al agua, a la luz y a la intemperie, bajo condiciones normales.

Gracias a una superficie más resistente, la lona tiene una vida útil más larga. Además, el procedimiento de soldadura impide un envejecimiento prematuro del hilo debido a influencias climáticas.

Wirksamer UV-Schutz

Der UPF-Faktor bei allen markilux Markisentüchern aus sunsilk snc und sunvas snc liegt im höchstmöglichen Bereich (UPF 50+), welcher uns von den Hohenstein-Instituten bestätigt wird. Der angegebene Wert erhöht die individuelle Eigenschutzzeit der Haut um das 50-fache, ohne Hautschäden davonzutragen.

Effective protection against UV radiation

The UPF factor of all markilux blind and awning fabrics is in the highest possible range (UPF 50+). This has been confirmed to us independently by the Hohenstein Institute. A UPF value of 50+ would enable you to sit out in the sun 50 times longer, without running the risk of damaging your skin, than you would without protection.

Protection efficace contre les rayons UV

Toutes les toiles de store markilux en sunsilk snc et sunvas snc atteignent les meilleures valeurs concernant le facteur de protection solaire UPF (UPF 50+) qui est attesté par les instituts indépendants Hohenstein. La valeur indiquée multiplie le temps de protection propre de la peau par 50 sans attraper un coup de soleil.

Protezione efficace contro i raggi UV

I tessuti sunsilk snc e sunvas snc raggiungono il massimo fattore di protezione solare possibile per i tessuti (UPF 50+) garantitoci dall'istituto di ricerca Hohenstein in Germania. I tessuti con un fattore di protezione UPF 50+ consentono di prolungare i bagni di sole di cinquanta volte, tenendo conto del tempo di protezione individuale della pelle, senza il rischio di scottature.

Protección eficaz contra la radiación ultravioleta

Todas las lonas markilux de sunsilk snc y sunvas snc alcanzan el factor máximo posible de protección solar para textiles (UPF 50+) que aprueba el Instituto Hohenstein. El valor indica que uno se puede exponer al sol con una duración de 50 veces más, teniendo en cuenta el tiempo de autoprotección individual de la piel, sin sufrir una insolación.

Öko-Tex Standard 100

Das Zertifikat „Öko-Tex Standard 100“ garantiert, dass markilux Markisentücher keine gesundheitsgefährdenden Farbstoffe oder Chemikalien enthalten.

Öko-Tex Standard 100

The certificate “Öko Tex Standard 100” guarantees that no harmful dyes or chemicals were used in the making of markilux awning covers.

Öko-Tex Standard 100

Le certificat « Öko-Tex Standard 100 » garantit que les toiles de stores markilux ne contiennent aucun colorant ou produit chimique nuisible à la santé.

Öko-Tex Standard 100

I teli per tende markilux sono privi di coloranti e sostanze chimiche nocive per la salute; lo garantisce il certificato „Öko-Tex Standard 100“.

Öko-Tex Standard 100

El certificado “Öko-Tex Standard 100” garantiza que las lonas para toldo no contienen ningún colorante o ninguna sustancia química nociva para la salud.

Licht- und Wetterechtheiten

Unsere Stoffe aus sunsilk snc und sunvas snc erreichen die besten Werte (Noten 7 bis 8) in der Bewertung der Licht- und Wetterechtheiten.

Light and weather fastness values

Our covers made from sunsilk snc and sunvas snc get the best values (marks 7 to 8) when rating their lightfastness and weather resistance.

Résistance optimale à la lumière et aux intempéries

Nos toiles en sunsilk snc et sunvas snc présentent les meilleurs résultats (notes de 7 à 8) d'évaluation de la résistance à la lumière et aux intempéries.

Resistenza alla luce e alle condizioni atmosferiche

Per quanto concerne la resistenza alla luce e alle condizioni atmosferiche i nostri tessuti in sunsilk snc e acrilico raggiungono i risultati migliori (voto: tra 7 e 8).

Resistencias a la luz y a la intemperie

Nuestros tejidos de sunsilk snc y sunvas obtienen los mejores valores (notas 7 hasta 8) en su resistencia a la luz y a la intemperie.

world of colours

ITRS
INDUSTRIEVERBAND
TECHNISCHE TEXTILIEN – ROLLADEN – SONNENSCHUTZ e.V.

Produkteigenschaften von Markisentüchern

Markisentücher bestehen aus technischen Geweben, die neben der funktionellen Aufgabe auch noch dekorativ sind. Sie sind Hochleistungsprodukte, die strengen technischen Anforderungen entsprechen. Bei jeder Produktion werden sie umfangreichen Labortests unterzogen.

Anforderungen wie Wasserdruckbeständigkeit, Steifigkeit, schmutz- und wasserabweisende Eigenschaften, Einreiß- und Weiterreißfestigkeit, Farbechtheit und viele andere Eigenschaften werden festgelegt, gemessen und für jedes Gewebe vom Weber garantiert.

Obwohl bei der Herstellung nur kontrolliertes Gewebe erster Wahl verwendet wird, sind der Perfektion Grenzen gesetzt. Bestimmte Erscheinungen im Tuch, werden von Markisenbesitzern mitunter beanstandet, sind aber auch beim heutigen Stand der Technik nicht vollkommen auszuschließen.

Knickfalten

Knickfalten entstehen bei der Konfektion und beim Falten des Sonnenschutzstoffes. An der gefalteten Stelle kann im Gegenlicht, vor allem bei hellen Farben, ein dunkler Strich sichtbar werden, der durch Knickung der Faser entsteht (Lichtbrechung). (Abb. 1, 2)

Welligkeit im Naht- und Bahnenbereich

kann entlang der Seitensäume, im Bereich der Nähte und mitten in den Bahnen entstehen. Das Tuch wird an den Nähten doppelt gelegt. Dadurch ergeben sich unterschiedliche Aufrolldurchmesser.

Die Spannung, die durch die Gelenkarme und das Durchhängen der Wickelwelle und/oder des Ausfallprofils entsteht, kann diese Effekte begünstigen. Auch wenn sich während einem starken Regen ein „Wassersack“ gebildet hat, kann sich Welligkeit bilden. (Abb. 3, 4)

Wasserdichtheit und Regenbeständigkeit

Sonnenschutzgewebe sind mit einem wasserabstoßenden Finish imprägniert und bleiben bei Nutzung nach Herstellervorgabe und einem Neigungswinkel von mindestens 14° während eines kurzen, leichten Regens regenbeständig. Bei längeren Nässeperioden und/oder schwerem Regenfall muss die Markise geschlossen bleiben oder eingerollt werden, um Schaden zu vermeiden.

Ist das Tuch einmal nass geworden, muss die Markise unverzüglich nach dem Regen zum Trocknen wieder ausgefahren werden, um einen Pilzbefall in Form von sog. Stockflecken zu vermeiden.

Seitenbahnenlängung

Das Tuch wird meist durch ein aktives Federsystem fast permanent auf Spannung gehalten. Nähte und Säume wirken zwar wie eine Verstärkung, müssen aber auch die größte Belastung aushalten. Beim Aufrollen des Tuches liegen die Säume und Nähte übereinander, was Druck und Spannung noch erhöht. Dadurch werden sie besonders beansprucht und gedehnt. Dies kann beim Ausfahren der Markise dazu führen, dass die Seitensäume leicht herunterhängen. (Abb. 5)

Die richtige Pflege für Ihr Markisentuch

Staub können Sie mit einer weichen Bürste im trockenen Zustand entfernen. Laub und ähnliche Verschmutzungen sollten Sie sofort beseitigen.

Kleine Flecken sind mit Wasser und einem handelsüblichen, vorzugsweise flüssigen, Feinwaschmittel (5-prozentige Seifenlösung; Wassertemperatur max. 30 Grad) zu entfernen. Spülen Sie gründlich mit Wasser nach.

Ausführliche Anleitungen für den Markisenkäufer mit allen wichtigen Hinweisen zur Bedienung, Pflege und Wartung liegen jeder Markisenlieferung bei.

Characteristics of awning covers

Awning covers are industrially manufactured textile products which serve both a functional and a decorative role. They are high performance products that meet the strictest technical requirements. They undergo extensive laboratory testing during every production run.

Criteria such as water impermeability, rigidity, dirt and water-repellent properties, resistance to tearing and to tear propagation, colour fastness and numerous other characteristics are defined, assessed and guaranteed for each fabric type by the weaver.

Although only first-class, quality controlled fabric is used in production, there are limits to the degree of perfection that can be achieved. Awning owners occasionally complain about certain imperfections in the fabric but such phenomena cannot be eradicated completely even with today's technology.

Creases

can appear during the cover making process and when the fabric is folded. A dark line may become visible at the crease when viewed against the light, especially in the case of light colours.

This is because the fibres become kinked when the fabric is folded so changing the light transmitting qualities of the material (refraction).

Puckering of the fabric

can occur along the side seams, near the seams and in the centre of the material length. The fabric is laid double at the seams. This results in different rolling diameters.

The tension of the folding arms and the weight of the roller tube and/ or the front profile can exacerbate this effect. puckering can also develop if a water trough forms during heavy rainfall. (fig. 3, 4)

Water impermeability and resistance to rain

Sunshade fabrics are impregnated with a water-repellent finish and, if properly cared for and used at a pitch of at least 14°, remain impervious to water during short light rainfall. During prolonged and / or heavy rainfall the awning must not be extended or should be retracted to prevent any damage.

Wet covers have to be fully extended again to dry properly and to avoid mould stains.

Elongation of side panels

In most cases awning covers are permanently under tension. The seams and hems are stabilising the cover but also have to bear the highest stress. During retraction the seams and hems wind in on a double layer which adds to the tension and causes increased wear and tear. This effect can lead to slightly slag hems when the awning is extended. (fig. 5)

The right care for your awning fabric

Dust can simply be wiped off the cover with a soft brush while the cover is dry. Leaves and any other kind of soiling should be removed immediately.

Smaller stains can be removed with standard light-duty liquid detergents (5 percent soap solution: maximum water temperature of 30°C).

Please thoroughly rinse with water.

All awning and blind deliveries include comprehensive instructions regarding the right maintenance and care of awning and blind covers.

Particularités des toiles de stores et entretien

Les toiles de stores sont des tissus techniques à la fois fonctionnels et décoratifs. Ce sont des produits hautement performants qui répondent à des exigences techniques très strictes. Au sortir de la production, chaque série est soumise à de nombreux tests approfondis en laboratoire.

Les exigences telles que l'étanchéité à l'eau, rigidité, propriétés antisalissantes et hydrofuges, résistance aux déchirures et aux propagations de ruptures, résistance aux décolorations et un grand nombre d'autres propriétés sont établies, mesurées et garanties par le tisseur pour chaque type de toile.

Bien que seules des toiles contrôlées de premier choix soient utilisées à la fabrication, la perfection a ses limites. Certains phénomènes peuvent faire l'objet de réclamations de la part des propriétaires de stores, mais ne peuvent être totalement exclus en l'état actuel de la technique.

Des pliures

apparaissent à la confection et au pliage des toiles de protection solaire. Un trait sombre provoqué par le pli de la fibre peut apparaître en contre-jour à l'emplacement du pliage, surtout lorsqu'il s'agit de couleurs claires (réfraction de la lumière). (Illustration 1, 2)

Des ondulations au niveau des coutures / soudures et des laizes

peuvent apparaître le long des ourlets latéraux, au niveau des coutures ainsi qu'au milieu d'une laize. La toile sera disposée en double épaisseur aux coutures. Il s'ensuit différents diamètres d'enroulement.

La tension provoquée par les bras articulés et l'affaissement du tube d'enroulement et/ou de la barre de charge peuvent favoriser ces effets. Des ondulations risquent également de se produire en cas de fortes pluies si des poches d'eau se créent. (Illustration 3, 4)

Etanchéité à l'eau et résistance à la pluie

Les tissus de protection solaire sont imprégnés d'une finition hydrofuge, bien entretenus et inclinés à au moins 14°, ils demeurent imperméables en cas de courte ondée. Lors de longues périodes de pluie et /ou de fortes pluies, le store doit rester fermé ou être enroulé afin d'éviter toute dégradation.

Si la toile est mouillée, le store devra être déroulé ultérieurement pour séchage afin d'empêcher la formation de taches de moisissure.

Élongation des laizes latérales

La toile sera presque toujours maintenue tendue par un système actif de ressorts. Coutures et ourlets font certes usage de renforcement, mais ils doivent également résister à des sollicitations élevées. Lors du déroulement de la toile, les coutures et ourlets sont superposés ce qui accroît encore la pression et la tension. Ainsi ils seront particulièrement soumis à épreuve et étirés. Lors du déploiement du store, ceci peut conduire à un léger affaissement des ourlets latéraux. (Illustration 5)

Conseils d'entretien pour votre toile de store

Enlevez la poussière de la toile sèche avec une brosse souple. Enlevez immédiatement les feuilles et autres saletés.

Lavez les petites taches avec de l'eau et une lessive pour linge délicat, liquide de préférence (solution savonneuse à 5% ; température de l'eau 30°max). Rincez abondamment à l'eau.

Des instructions détaillées pour les acheteurs de stores, contenant toutes les informations importantes concernant leur utilisation, entretien et maintenance sont jointes à chaque livraison.

Caratteristiche dei teli per tende da sole

I teli per tende da sole sono tessuti tecnici non soltanto funzionali ma anche decorativi. Si tratta di prodotti dalle prestazioni elevate, in grado di soddisfare severi requisiti tecnici. In occasione di ogni produzione, sono sottoposti ad esaustivi test di laboratorio.

Per ogni tipo di telo, il tessitore fa determinare e misurare i requisiti di impermeabilità, rigidità, resistenza allo sporco, all'acqua, all'usura ed allo strappo, resistenza dei colori alla luce e numerose altre proprietà – proprietà che poi garantisce.

Anche se per la produzione viene utilizzato solo tessuto controllato di prima qualità, la perfezione ha dei limiti.

Pieghe

Compaiono al momento del confezionamento e del piegamento del telo per la protezione solare. In contro-luce, soprattutto se il telo è chiaro, sul punto piegato può diventare visibile una striscia scura dovuta alla piegatura della fibra (rifrazione della luce). (Fig. 1, 2)

Ondulazioni nell'area delle cuciture e delle giunzioni

Possono formarsi lungo gli orli laterali, nella zona delle cuciture oppure al centro dei teli. In corrispondenza delle cuciture il telo è doppio. I diametri di arrotolamento, quindi, sono diversi.

La tensione sviluppata dai bracci estensibili e dall'abbassamento del rullo avvolgitore e/o del profilo frontale può favorire quest'effetto. Possono presentarsi delle ondulazioni anche se si è formata una sacca d'acqua durante una forte precipitazione piovosa.(Fig. 3, 4)

Impermeabilità e Resistenza alla pioggia

I tessuti con protezione solare sono impregnati con un finissaggio idrorepellente e - se vengono sottoposti a una buona manutenzione e presentano un'inclinazione minima di 14° – sono resistenti alle piogge brevi e leggere. In caso di pioggia forte e temporali la tenda va chiusa, per evitare eventuali danni.

Se il telo si è bagnato quando finisce di piovere si consiglia di riaprire la tenda per evitare la formazione di macchie di muffa.

Allungamento dei teli laterali

Il telo viene mantenuto permanentemente teso mediante un sistema a molle attivo. Pur avendo un effetto rinforzante, le cuciture e gli orli devono anche sopportare la gran parte delle sollecitazioni. Durante l'arrotolamento, le cuciture e gli orli sono sovrapposti; quindi la tensione e la pressione aumentano ulteriormente. Questo fenomeno li sottopone a particolari sollecitazioni e dilatazioni. In fase di apertura della tenda da sole, questo può fare sì che gli orli laterali della tenda possano abbassarsi leggermente.

Curare correttamente il proprio telo

Rimuovere la polvere con una spazzola morbida con la stoffa asciutta. Eliminate immediatamente le foglie e la sporcizia analoga.

Le piccole macchie possono essere rimosse con l'acqua e un detersivo per prodotti delicati, preferibilmente liquido, comunemente reperibile in commercio (soluzione di sapone 5 per cento; temperatura dell'acqua max 30 gradi).

Ogni tenda da sole viene consegnata corredata da istruzioni dettagliate per l'acquirente e da indicazioni importanti sull'uso, sulla cura e sulla manutenzione.

Características de lonas para toldos

Las lonas para toldo son tejidos técnicos que, además de ser funcionales, también son decorativos. Son productos de alta calidad que corresponden a estrictas exigencias técnicas. Durante cada producción se realizan extensas pruebas de laboratorio.

Se determinan y miden para cada lona los requisitos de impermeabilidad, rigidez, características repelentes al agua y la suciedad, resistencia al desgarramiento y a la rotura, la solidez del color y muchas otras características, siendo garantizadas por el tejedor.

Aunque para la fabricación sólo se utilizan lonas controladas de primera calidad, la perfección tiene sus límites. Algunos fenómenos que pueden tener lugar en la lona, pueden ser reclamados por el dueño del toldo, pero estos todavía no pueden ser evitados por completo con la técnica actual.

Arrugas

Se originan durante la confección y en el momento de doblar la lona. En la parte plegada puede verse en contraluz una raya oscura que se origina por la plegadura de las fibras (refracción). Este efecto se da sobre todo en los colores claros. (Ilustr. 1, 2)

Ondulación en las zonas de las costuras y los anchos

Puede ocurrir cerca del dobladillo lateral o dentro de los anchos de la lona. La lona se coloca doble en las costuras. Por esta razón hay diferentes diámetros de enrollamiento.

Gracias a la tensión de los brazos y el pandeo ligero del tubo de enrollado de la lona y/o el perfil frontal, este efecto puede verse favorecido. También cuando, debido a una lluvia fuerte, se han formado sacos de agua en la lona, se pueden crear arrugas. (Ilustr. 3, 4)

Impermeabilidad / Resistencia a la lluvia

Los tejidos para protección solar están impregnados con un recubrimiento repelente al agua; si se ha cuidado debidamente y si están colocados con una inclinación mínima de 14°, son resistentes a una lluvia ligera. En el caso de largos periodos de lluvia y/o una lluvia fuerte, el toldo debe permanecer cerrado o ser recogido para así evitar daños.

Si la lona se ha mojado, se debe extender el toldo para que se seque y así evitar que le salgan manchas.

Dilatación de los anchos laterales

La lona es tensada prácticamente de forma permanente por medio de un sistema de muelles.

Las costuras y los dobladillos tienen un efecto de refuerzo pero sufren a su vez las cargas más fuertes.

Al enrollar la lona, las costuras y los dobladillos quedan sobrepuestos, lo cual hace que existe más presión y más tensión. Por esta razón ocurre que se aplastan, aumentando su longitud.

Esto puede provocar que al sacar el toldo los dobladillos laterales cuelgan ligeramente. (Ilustr. 5)

El cuidado perfecto para la lona de su toldo

Eliminar el polvo con un cepillo suave en estado seco.

Las hojas secas y suciedades similares se deberían eliminar inmediatamente.

Pequeñas manchas se eliminan con agua y un detergente fino corriente, preferiblemente líquido (solución jabonosa del 5% y temperatura máx. del agua 30°). Aclarar con agua abundante.

En cada suministro de los toldos encuentra adjunto las instrucciones correspondientes detalladas para el consumidor final, con todas las indicaciones importantes para el manejo, cuidado y mantenimiento del toldo.

sunsilk snc – technisches Material mit brillantem Leuchten

Auf Grund der hohen Leuchtkraft und Farbbrillanz zeigen die Abbildungen die sunsilk Tücher im Durchlicht.

sunvas snc – textiles Material mit softem Leuchten

Die Abbildungen zeigen die sunvas Stoffe in der Aufsicht.

Die aktuelle markilux collection mit Original-Stoffproben hält Ihr markilux Fachpartner für Sie bereit. Wir empfehlen den Markisenstoff und seine Farbwirkung sowohl im Durchlicht als auch in der Aufsicht zu betrachten.

sunsilk SNC the brilliantly luminous technical material

Because of their superior luminosity and brilliance the sunsilk materials can best be viewed against the light as in the illustrations shown.

sunvas SNC the softly glowing textile material

The illustrations show sunvas fabrics when lit from the front.

Your markilux dealer will make the whole markilux collection available to you. We recommend you assess the lighting effect created by awning fabrics both when backlit and when lit from the front.

The actual fabric colours may differ slightly from those depicted. Printed is not woven.

La double épaisseur de tissu au niveau des ourlets et jonctions des laizes entraîne des différences de couleurs inévitables sur les toiles de stores cousues et collées; le tissu paraît plus sombre à ces endroits.

L'illustration souligne l'éclat des couleurs de la toile de store au niveau de sa transparence, comme dans la réalité lorsque vous jouissez de l'ombre lumineuse de votre store.

En règle générale, tous les motifs des toiles de stores markilux sont confectionnés à partir de laizes larges de 120 cm; les illustrations ne montrent pas le tissu dans toute sa largeur. Sous réserve de différences de couleurs dans les illustrations. Imprimé n'est pas tissé.

sunsilk SNC un material técnico con un brillo intenso

Debido a la brillantez de colores intensa las ilustraciones muestran las lonas sunsilk en contraluz.

sunvas SNC un material textil con un brillo suave

Las ilustraciones muestran los tejidos sunvas en la vista por encima.

Su distribuidor especializado tiene a su disposición la colección completa de markilux. Recomendamos comprobar el tejido y su efecto cromático respectivamente tanto en contraluz como visto por encima. Salvo diferencias de colores en las ilustraciones. Una impresión de una lona siempre difiere del tejido real.

L'illustrazione mostra la brillantezza dei colori del telo in trasparenza così come la si percepisce quando ci si gode l'ombra luminosa della tenda da sole.

Di norma tutti i modelli di teli per tende markilux rappresentati sono realizzati utilizzando rotoli di stoffa larghi 120 cm; le illustrazioni non mostrano il tessuto in tutta la sua larghezza.

Con riserva di differenze cromatiche rispetto alle illustrazioni. La stampa è non tessuto.

 Gewebebreite
Fabric width
Largeur du tissu
Larghezza del tessuto
Ancho del tejido

 Wasserdichte
Waterproof standard
Imperméabilité à l'eau
Resistenza all'acqua
Impermeabilidad

 Strahlungstransmissionsgrad
Anteil der auftreffenden Sonnenstrahlung, der direkt vom Sonnenschutz durchgelassen wird.
Solar direct transmittance
That part of the sun's direct radiation that passes through the sun shading unit.
Transmission des rayons solaires
Proportion du rayonnement solaire percutant qui pénètre directement le produit de protection solaire.
Trasmisione di raggi
Parte percentuale della radiazione solare trasmessa direttamente dalla protezione solare.
Grado de transmisión de la radiación solar
Valor de los rayos del sol impactantes que traspasan la protección solar directamente.

 Rapport, ca.-Werte
Pattern repeat, approx. values
Rapport, valeurs approx.
Rapporto, valori approssimativi
Raport, valor aprox.

 Lichtechtheit
Light fastness
Résistance à la lumière
Resistenza alla luce
Resistencia a la luz

 Strahlungsreflektionsgrad
Anteil der auftreffenden Sonnenstrahlung, der vom Sonnenschutz reflektiert wird.
Solar direct reflectance
That part of the sun's direct radiation that is reflected by the sun shading unit.
Réflexion des rayons solaires
Proportion du rayonnement solaire percutant qui est réfléchi par le produit de protection solaire.
Riflessione di raggi
Parte di radiazione solare riflessa dalla protezione solare.
Grado de reflexión de la radiación solar
Valor de los rayos impactantes que estan reflejados por la protección solar.

 Einfaßbandfarbe
Braid colour
Coloris de l'ourlet
Colore nastro di bordatura
Color del ribete

 Wetterechtheit
Weather fastness
Résistance aux intempéries
Resistenza alle intemperie
Resistencia a la intemperie

 Strahlungsabsorptionsgrad
Anteil der auftreffenden Sonnenstrahlung, der vom Sonnenschutz aufgenommen und in Wärme umgewandelt wird.
Solar direct absorptance
That part of the sun's direct radiation that is absorbed by the sun shading unit and is converted into heat.
Absorption des rayons solaires
Proportion du rayonnement solaire percutant qui est réceptionnée et transformée en chaleur.
Absorbimento di raggi
Parte di radiazione solare assorbita dalla protezione solare e trasformata in calore.
Grado de absorción de la radiación solar
Valor de los rayos del sol impactantes que estan absorbidos por la protección solar y convertidos en calor.

 Gewebedicke
Fabric thickness
Épaisseur du tissu
Spessore del tessuto
Grosor del tejido

 UV Schutzgrad
UV protection factor
Degré de résistance aux U.V.
Grado di protezione ai raggi UV
Grado de protección UV

 Lichttransmissionsgrad
Anteil des auftreffenden Lichts, der vom Sonnenschutz hindurch gelassen wird.
Light transmittance
Proportion of visible light that passes through the sun shading unit.
Transmission de la lumière
Proportion de la lumière percutante qui est laissée passer par le produit de protection solaire.
Trasmisione di luce
Parte di luce che filtra attraverso la protezione solare.
Grado de transmisión de la luz
Valor de la luz impactante que traspasa la protección solar.

 Gewicht
Weight
Poids
Peso
Peso

 FC-Wert
Summe des direkten Strahlungstransmissionsgrads und des sekundären Wärmeabgabegrads, der vom Sonnenschutz absorbiert wird. Gesamtenergiedurchlassgrad des Sonnenschutzes.

Fc value
The sum of the solar direct transmittance, the solar indirect transmittance and the degree of secondary heat emission that is absorbed by the sun shading unit. The total energy transmittance value of the sun shading unit.

Facteur FC
Somme du degré de transmission du rayonnement solaire direct et du degré de remise de chaleur secondaire qui est absorbé par le produit de protection solaire. Degré de transmission totale de l'énergie du produit de protection solaire.

Coefficiente FC
Summa del fattore di trasmissione solare diretta e del fattore di trasmissione di calore secondario (che viene assorbito dalla protezione solare). Indica il grado di energia solare complessiva trasmessa dalla protezione solare.

Factor FC
Suma del grado de transmisión directo de los rayos y grado de reflexión del calor que esta absorbido por la protección solar se llama grado de transmisión total de energía de la protección solar.

markilux Markisentücher aller abgebildeten Dessins sind in der Regel aus 120 cm breiten Stoffbahnen gefertigt.

- Dessin auch als sunvas transolair erhältlich, siehe specials Serie sunvas transolair.
- ◆ Dessin auch als Breitware für nahtlose Tücher bis 230 cm Ausfall erhältlich.
- Dessin auch als Breitware für nahtlose Tücher bis 300 cm Ausfall erhältlich.
- ▶ Dessin auch als sunvas perla erhältlich, siehe specials Serie sunvas perla.

Farbdifferenzen zu den Abbildungen und technische Änderungen vorbehalten.

markilux awning covers in the fabric patterns shown are made from fabric panels 120 cm wide as a rule.

- fabric also available as sunvas transolair; see the specials range – sunvas transolair
- ◆ also available as widely woven fabrics for the manufacture of seamless covers up to a drop of 250 cm
- also available as widely woven fabrics for the manufacture of seam less covers up to a drop of 320 cm
- ▶ fabric also available as sunvas perla; see the specials range – sunvas perla

The actual fabric colours may differ slightly from those depicted.

Tous les motifs des toiles de store markilux sont confectionnés en règle générale à partir de lés de tissu de 120 cm.

- Motif de toile également disponible en sunvas transolair. Voir série specials – sunvas transolair.
- ◆ Motif de toile également disponible en laizes plus larges sans couture jusqu'à une projection de 230 cm.
- Motif de toile également disponible en laizes plus larges sans couture jusqu'à une projection de 300 cm.
- ▶ Motif de toile également disponible en sunvas perla. Voir série specials – sunvas perla.

Sous réserve de différences de couleur dans les illustrations.

Di norma tutti i modelli di teli, per tende markilux rappresentati, sono realizzati con corsie di stoffa alte 120 cm.

- Disegno disponibile anche in sunvas transolair, vedere serie speciale sunvas transolair.
- ◆ Disegno disponibile anche in grande altezza per teli senza cuciture fino alla sporgenza di 230 cm.
- Disegno disponibile anche in grande altezza per teli senza cuciture fino alla sporgenza di 300 cm.
- ▶ Disegno disponibile anche in sunvas perla, vedere serie speciale sunvas perla.

Possibilità di differenze cromatiche rispetto alle fotografie.

Todos los diseños de los anchos de las lonas para toldos markilux, son en regla general de 120 cm de ancho.

- Diseño también disponible como sunvas transolair. Véase la serie specials – sunvas transolair.
- ◆ Diseño disponible también como lona ancha sin costuras hasta 230 cm de salida.
- Diseño disponible también como lona ancha sin costuras hasta 300 cm de salida.
- ▶ Diseño también disponible como sunvas perla. Véase la serie specials – sunvas perla.

Salvo diferencias de colores en las ilustraciones.
